

10 Years, 10 Leaders: Honoring Excellence in Lead Service Line Replacement

Informational Webinar

December 15, 2025

LSLR Collaborative

The LSLR Collaborative's goal is to accelerate full lead service line replacement in communities across the United States.

10 Years Supporting LSL Replacement

We create and spread tools, resources, and connections to help communities replace LSLs

- Replacement roadmap
- Case examples
- Webinars
- LSLR 101 video
- Equity analysis guide
- Connecting sectors

The LSLR Collaborative encourages local communities to accelerate the full replacement of lead service lines (LSLs) through a collaborative effort at the local level. With the reduction of lead in new plumbing material, the next large opportunity for reducing risk of exposure to lead in drinking water is the removal of LSLs.

The roadmap poses a set of questions to help community leaders, elected officials, drinking water professionals, and public health professionals accelerate full lead service line replacement and tailor an initiative to local circumstances. It also includes links to information and examples from other communities. This information will help a community get from the initial decision to remove lead service lines to a plan ready for implementation.

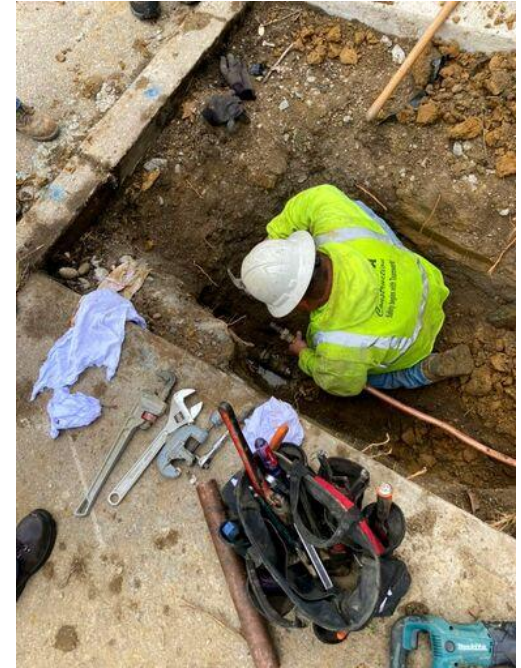

Communities vary in size, types of public water systems, number of LSLs, responsibility for LSLs, resources, and governance. Thus, the roadmap does not prescribe one approach to LSL initiatives. One size does not fit all. Rather, the roadmap is intended to support each community in a collaborative effort to develop their own LSL replacement initiative.

LSL replacement is not a simple task, nor is engaging in a meaningful public dialogue on concerns related to children's health and on solutions that may be expensive. This set of tools focuses on

10 Years, 10 Leaders Initiative

- Recognition event honoring excellence in 10 essential areas of LSL replacement
- Categories reflect the principles and practices promoted by the LSLRC for fair and effective LSL replacement
- Honorees will be recognized at AWWA's ACE event in D.C. in June 2026 and featured in webinar/media
